

YOUR ACCOUNTANTS ARE ONE CLICK AWAY FROM MAKING THE SHORTLIST

LEVERAGE YOUR FIRM'S GREATEST UNTAPPED RESOURCE

An accountant's greatest untapped resource is his network, yet only 3% of accountants share articles regularly to LinkedIn or Twitter. With ClearView Social, you can get them sharing to their networks in just a single click.

HOW IT WORKS:

SUGGEST articles, blog posts, events or positive press for your team to share. Your designated admin sends a weekly or daily email through our system. They can automate this process, or drag and drop articles from a content library populated automatically by new content from your website and blogs.

ONE CLICK is all it takes. When a member of your team hits the "share" button, the designated article will be scheduled to be shared at the best date and time to that person's individual LinkedIn, Twitter and even Facebook account. Once the article is scheduled they will always have the opportunity to modify, reschedule or even cancel the scheduled share.

AMPLIFY is an understatement. The average firm sees a 1000% increase in sharing and 10,000% increase in reach once they have ClearView Social up and running. Your team's expertise, knowledge and experience will now be amplified keeping more of your most talented people top of mind with their existing networks.

MEASURE what matters. With ClearView Social we show you which articles are getting most clicks, which companies are reading what you share, and with our new integration, we can even show you the names of some of the people that click on the articles you share.
